

K22U 3409

Reg. No. :

Name :

I Semester B.Sc. Degree (CBCSS – OBE – Regular/Supplementary/
Improvement) Examination, November 2022
(2019 Admission Onwards)

COMPLEMENTARY ELECTIVE COURSE IN CHEMISTRY/POLYMER
CHEMISTRY

1C01CHE/PCH : Chemistry for Physical and Biological Sciences

Time : 3 Hours

Max. Marks : 32

SECTION – A

(Very short answer type-**Each** carries **1** mark. Answer **all 5** questions).

1. According to Bohr's atomic model, the radius of the orbit is directly proportional to
2. How many atomic orbitals are present in the fourth energy level of an atom ?
3. The hybridization in BeF_2 is
4. Which environmental segment interacts with all the other environmental segments ?
5. The degree of hydrolysis of a salt of a weak acid and a weak base in 0.1 M solution is found to be 30%. If the molarity of the solution is 0.2 M, the salt's percent hydrolysis should be

SECTION – B

(Short answer type-**Each** carries **2** marks. Answer **4** questions out of 6).

6. What is Heisenberg's uncertainty principle ?
7. What is the order of wavelength associated with a 200 g golf ball moving at a speed of 5 m s^{-1} ?
8. What is ionization energy ? Write the conditions favoring the ionic bond formation.

P.T.O.

9. What is BOD ? How does BOD effect water quality ?
10. Write notes on acid rain.
11. At 25 degrees Celsius, the sodium salt of a weak monobasic organic acid is hydrolyzed to a 3 percent extent in its 0.1 M solution. What is the acid's dissociation constant, given that the ionic product of water at this temperature is 10^{-14} ?

SECTION – C

(Short essay type-**Each** carries **3** marks. Answer **3** questions out of 5).

12. How atomic radii and ionization energy vary in periodic table ? Explain.
13. What is hydrogen bonding ? What are the conditions to form hydrogen bond ? What are the types of H-bonds ?
14. What is hybridization ? Explain sp^3d and sp^3d^2 hybridization with examples.
15. Write in brief about the major segments of environment.
16. Find the pH of the solution obtained when 1.00 mol NH_3 and 0.40 mol NH_4Cl are mixed to give 1 L of solution. $K_b(NH_3) = 1.8 \times 10^{-5} \text{ mol L}^{-1}$.

SECTION – D

(Long essay type-**Each** carries **5** marks. Answer **2** questions out of 4).

17. a) Explain atomic spectra of hydrogen.
b) What are quantum numbers ? How is it related to orbitals ?
 18. Explain Born Haber cycle for the formation of NaCl.
 19. Briefly discuss air pollution.
 20. Discuss different concepts of acids and bases.
